

Why choose us

1. Energy efficiency auditing - Expert Advice from Experienced People.

Our qualified engineers will complete a comprehensive site survey, assessing the efficiency of your existing gas requirements before designing a solution to suit your individual needs. Our teams have worked with clients on a couple of gas projects. Each project has provided new ideas and lessons that can be passed on to you.

That's not all. We deliver more than just LPG; the type and quality of technical services that we offer are comparable with anyone in the market place. Our expert team provides innovative solutions for gas engineering work.

From planning the most efficient systems, to developing cutting edge technology to match our customers' ambitions, we can see the whole project through. All our technical services are available independently of any gas supply.

2. Up and running in one week

Our engineering team provides a complete service, from civil works, installation & commissioning of new gas equipment and LPG tanks, to removal of your old gas equipment. Your gas project can be up and running in just one week depending on the design. The best part is that it's a completely hands free process for you. Just email us and we'll send through a

reply setting out the information that we need to set up your gas project. We'll send the plan back to you for checking and approval before making it go live.

3. Reliable Fuel Supply Fully hosted and supported by our team

We don't like to shout about it, but **3Gas** is one of the names in the LPG industry with a reliable nationwide delivery network, you can be confident about your gas supply. We will install gas for you so that we can provide full technical support at any time. In the rare event that anything does go wrong, you know exactly who to call. We take the pressure off you or your team. By installing the gas project ourselves, we can also continually improve it in response to your feedback. You will see upgrades just about every month as we learn more about your needs.

4. Financial Solutions - Proving the economic case

3Gas is uniquely placed to offer not only competitive pricing, but also a full range of financial options, including fixed pricing & energy efficiency financing. Savings from the proposed solution and new equipment will result from both improved system efficiency and fuel cost savings. We will demonstrate savings you can expect before any work is started.
